For its soothing and grateful influence on the scalp, and for the removal and prevention of dandruff, Ayer's Hair Vigor has no equal. It restores faded or gray hair to its original dark color, stimulates the growth of the hair, and gives it a beautiful, soft, glossy and silken appearance. add&wlv

The funeral of Will S. Stevenson, who died in Philadelphia on the 28th ult., took place from the residence of his brother-in-law, Mr. Chas. Seiwel, No. 1,061 East Eldorado street, on Sunday afternoon, at two o'clock, and was one of the most largely attended that has ever occurred in this city.

The services were conducted by Rev. W. H. Webster, pastor of the Stapp's Chapel congregation, of which the father of the deceased was formerly pastor, in which he paid a glowing tribute to the worth and christian character of the deceased, affecting many to tears. The music was furnished by the Chapel choir. When the procession moved to the cemetery it was headed by Goodman's band and the Deatur guards, of which the deceased was formerly a member, numbering about forty-five men, then followed carriages to the number of four or more, and hundreds of persons on foot. The services at the grave, in Greenwood cemetery, were equally solemn and impressive, and moistened many eyes that were unused to tears. A salute was fired over his grave by his old comrades and all that was mortal of a worthy and highly esteemed young man, on down in the noonday of manhood, was left to sleep the sleep that knows no waking, until the resurrection morn.

THE CHOLERA.

The Unfavorable Condition of the Atmosphere Causes a Renewal of Fear at Marseilles.

The Inhabitants of Toulon Jubilant Because There Were No Deaths in that City Sunday.

The Sanitary Conference Called to Meet at Washington Postponed Because of Favorable Reports.

Latest from Infected Districts.

UNFAVORABLE WEATHER. Marseilles, Aug. 4.—Fifteen deaths from cholera occurred here in the twenty-four hours ending at nine o'clock last night. The cool weather of the past few days has been succeeded by stifling heat, and fears are entertained that the change in temperature will add to the mortality list.

Toulon, Aug. 4.—The inhabitants are jubilant over the official announcement that no deaths from plague occurred here yesterday. Thirty cases were taken to the hospital.

Rome, Aug. 4.—Several cases of cholera were reported yesterday in various parts of Italy. There have been many deaths at Borgo San Dalmazzo, the inhabitants believing that the doctors and chemists poisoned a girl who died there from cholera. Stringent orders have been issued by the Government that all lines arriving from France be disinfected or burned.

Washington, Aug. 4.—In consequence of the more favorable reports from the cholera districts in Europe the proposed international conference of health boards which was to have taken place in this city on Thursday next has been postponed to a later day not named.

Marseilles, Aug. 4.—A falling temperature, followed by heavy rains and a heavy fog, has prevailed at Arles for the last two days, and the public health is worse, although there is not much change in the number of fatalities. Unless sunshine and a breeze come soon the epidemic is apt to assume a virulent form.

The violence of the epidemic at Arles is attributed to polluted water, a number of wells having been contaminated by manure. Many of them have since been cleaned, and the infected reality is now a serious sanitary restriction that no further trouble from that source is expected.

The newspapers of Rome continue to agitate the effect of a vigorous quarantine. The Italian people have perhaps suffered greater inconveniences and losses by the quarantine regulations now in effect at various Mediterranean ports than have any other nation. The Roman press claims that a rigorous quarantine encourages the spreading of the epidemic.

The lazaretto are becoming a source of apprehension. In many of them the facilities are very bad and the supply of good food is limited. The people are huddled together, badly fed, poorly accommodated, and the water is scarce and unpure. Many cases of cholera have occurred at the lazarettos from washing the linen of infected people.

At Madrid the diminution of cholera in the southern provinces of France is reassuring the public mind that there are increasing hopes of Spain escaping a visitation.

The Catholic Church, notwithstanding the apparent abatement of the disease, continues diligent in its work for the sufferers. It has furnished a great amount of money; the clergymen have done much personal labor and Sisters of Mercy have attended nearly every bedside in the hospitals of the country. To-day the Archbishop will march at the head of a street procession which will inspire Divine aid.

When the epidemic appeared in the city the trees and shrubbery were infested with birds, and the parks were kept alive with their song. Now there is not a bird in the city. There have been none here since the epidemic attained its height. The silence which has arisen in the absence of their song is noticeable and depressing. There are several theories advanced, but the one most accepted is that the birds have been forced away by the impurity of the air.

Preparations for an Ex-Confederate Reunion. DALLAS, Tex., Aug. 4.—The preparations for the reunion of ex-Confederates, under the auspices of the ex-Confederate Society of Missourians, to begin here Wednesday, are nearly all completed, and are on the most elaborate scale ever known in the South. The camp grounds will be Cave's Grove, of nearly 800 acres, at Long's Lake, a mile northwest of the city on the Missouri Pacific Railroad. There are accommodations for 40,000 campers, including special arrangements for cavalry, artillery and infantry commands. The reunion is to last four days. The cash and other contributions exceed \$10,000, and the barbecue will be the most extensive ever given in this section. From present indications Mr. and Mrs. Jefferson Davis will be here, accompanied by General Beauregard, General Eddy and Director-General Burdett of the New Orleans Exposition. All ex-Union soldiers have been invited to participate, and prominent members will deliver speeches in their behalf.

The Fraternity Assured that He Will Receive No Republican Patronage—The National Committee's Action Unmistakable.

NEW YORK, Aug. 4.—Saturday evening the sub-committee from the Central Labor Union called at the headquarters of the Republican National Committee for the purpose of obtaining an answer to the request that the committee would use its efforts to make the Tribune a union office or repudiate it. After considerable discussion the following document was drawn up and signed: "The Executive Committee of the Republican National Committee authorize to state that they have not given, and will not give any patronage to the New York Tribune during the campaign." This is signed by E. F. Jones, Chairman, and Samuel Fessenden, Secretary; Secretary William McCubbin, of Typographical Union No. 6; Edmund Foster, of the Labor Club, Brooklyn; and John Denney, of the Painters' Union. The witnesses are Robert Blissett, of the Clothing Cutters' and Eben Thompson, of the Painters'. At the close of the discussion one of the committee from the Labor Union stated that the most influential men in the country had tried to induce Whitelaw Reid to grant the request of the Union, but that he had positively refused to make the Tribune a Union office. The committee seemed satisfied as the result of their efforts, and said that the National Committee, by their action, had virtually boycotted the Tribune.

As the latter was not regularly signed by the members of the National Committee, the Central Labor Union, at its meeting yesterday, resolved to confer with the committee and demand an official answer, as the document does not possess any value unless properly subscribed. Typographical Union No. 6 reported that a committee with the same name had been formed, and had just reported visited the National Committee, and they also refused to recognize the document.

SWINDLING THE GOVERNMENT.

Custom Seizures in Montreal Create a Sensation in the Jewelry Trade.

MONTREAL, Can., Aug. 4.—The customs officers have made seizures of valuable goods imported from the United States, and entered under value with the intention of defrauding the revenue, from some of the wealthiest and largest wholesale firms in Montreal. The first descent was on F. & A. Evans, where seizures were effected to the amount of \$6,000; the warehouses of Selwobbs Bros., diamond and watch importers. William Evans and L. A. Saunders, wholesale jewelers, were next visited. Large seizures were made, but their value is not known. The affair has created a sensation in the jewelry trade. Other seizures are expected. It is rumored that several large seizures have been made out of Montreal, but nothing definite can be learned. Only Mr. George Hogg, of Montreal, had to pay \$15,000, and William Evans \$5,000 for entering goods for eighteen months previously under an exact similar charge.

The Bankers' Convention.

NEW YORK, Aug. 4.—A meeting was held yesterday at the American Bankers' Association rooms to make arrangements for the Bankers' Convention at Saratoga on August 13 and 14. Many letters were received from leading bankers in Western cities. Mr. Conneys, Mr. W. H. Patterson, of Philadelphia, and other leading bankers of Pennsylvania, will speak on banking methods in that State. Ex-Secretary McCulloch will deliver an address on banking progress and currency dangers. Several papers from English and European bankers will be presented. Mr. George Hogg, of Montreal, and several leading bankers of Canada will be present, and will address the convention. The first day's proceedings will be followed by an evening reception of the delegates by the President and Executive Council. More than 1,700 special invitations have been issued this week, and the attendance is expected to be very large from the West and South.

Our Coast Defenses.

WASHINGTON, Aug. 4.—The Chief Engineer of the army has received the annual reports of all the engineer officers in charge of the coast and harbor defenses. They assert that the Atlantic coast and the lake fronts are in an almost totally defenseless condition. The majority of the defenses are falling into decay. The forts are in most instances so far behind the times as to be utterly worthless. General Newton, it is understood, will, in his annual report, urge immediate provision for the adequate protection of the harbors by batteries and fortifications of modern design.

VANDALIA, Ill., Aug. 4.—During the last month or two hundreds of hogs in the eastern and southeastern portions of this country have fallen victims to the cholera. Buried in the Ruins.

A WASHINGTON HOTEL FALLS.

WASHINGTON, Aug. 4.—The back part of the United States Hotel building, situated on Pennsylvania avenue, a short distance west of the capitol, fell in without warning last evening and buried in the ruins a number of the inmates. The building has a frontage of one hundred and twenty-five feet and a depth of one hundred and eighty feet. A small portion of the rear wall was the first to give way, and a general collapse of the whole rear portion immediately followed, sending up a great cloud of dust. A general fire alarm was sounded which brought to the scene a number of fire engines and hook and ladder companies and a force of police. There were about forty persons in the hotel at the time, including the guests and employees, and it was impossible at first to ascertain how many were buried in the mass of debris. Cries and groans could be heard from the ruins, showing that all who were there were not killed. A large force of men went to work at once, and in an hour Ernest Snooks, a boy eleven years of age, and Annie Dickson, a colored chambermaid, were taken both alive and badly injured. Mrs. Belding, wife of the proprietor of the hotel, was rescued alive at 11:30 o'clock, after having been imprisoned four hours. She was on the first floor of the back building, and was caught in a narrow Y-shaped space formed by a part of the second floor resting in a slanting position against the side wall. After the firemen and volunteers had worked two hours digging down into the debris from the surface, a force of firemen under Captain Cropper entered from the front of the building against the back of which timbers and bricks had partly lodged, and bearing groans, worked their way back by removing timbers and supporting others. They finally got near enough to see Mrs. Belding and later with her, and eventually to hand her some water and whisky. She was not crushed, but was held down by her clothes and pinned in by fallen timbers. Jacks were brought and the weight laid up which saved and axes were used to cut a way to her. At last the rescuers got close enough to cut her clothing loose, and they were enabled to extricate her. She was apparently not severely injured, but was very much exhausted, and fainted as she was being lowered. It is feared that those who have not yet been rescued are dead. The part of the building which fell contained rooms appropriated to the use of the employees of the hotel.

Mexico Wants a Loan.

WASHINGTON, Aug. 4.—It is stated that about three weeks ago Diaz sent a confidential friend to a great New York banking firm with a proposition for a loan to the Mexican Republic. Besides the usual guarantee, he offers as a special pledge the State of Chihuahua, perhaps the best of the North Mexican States. If this proposition is accepted, the Mexican agent in London, Don Ignacio Ibarra, will notify the British bondholders when and where they will receive their money. If the United States will send a special ambassador with extraordinary powers to represent the situation to the President and Congress of the United States and ask for assistance, pledging, if necessary, the State of Chihuahua as part of the collateral to secure the return of the money, Mexico owes Englandmen \$50,000,000 and Americans \$30,000,000.

England Controlling a Maritime Highway.

PARIS, Aug. 4.—The République Française, commenting upon the extension of British fortresses from Aden to Perim, says Great Britain, in forming a naval cordon from Port Said to Aden, has taken practical possession of the highway of the East in violation of treaties. The République Française claims to have information from a trustworthy source that the French Government has not permitted the English operations to pass unnoticed. The cabinets of Rome and Paris, the writer declares, must take means to warn England of the existence of treaties.

Lynched for Killing a Peacemaker.

GLASGOW, Mo., Aug. 4.—Two negroes were quarreling here Saturday when Thomas Sophy, a highly-respected colored citizen, attempted to separate them. Harrison McKoy, one of the disputants, drew a revolver and shot the would-be peacemaker, who died shortly afterward. McKoy was arrested and jailed. About two o'clock yesterday morning a mob composed of white and colored citizens assembled around the jail, which they broke open. They then took the murderer outside the city and hanged him to a tree.

A MARVELOUS STORY

TOLD IN TWO LETTERS.

FROM THE SON:

"28 Cedar St., New York, Oct. 28, 1882. 'Gentlemen: My father resides at Glover, Vt. He has been a great sufferer from Scrofula, and the enclosed letter will tell you what a marvelous effect

Ayer's Sarsaparilla

has had in his case. I think his blood must have contained the humor for at least ten years; but it did not show, except in the form of a scrofulous sore on the wrist, until about five years ago. From a few spots which appeared at that time, it gradually spread so as to cover his entire body. I assure you he was terribly afflicted, and an object of pity, when he began using your medicine. Now, however, he is well, and I feel perfectly well in every respect—being now able to do a good day's work, although 73 years of age. Many inquire what has wrought such a cure in my case, and I tell them, as I have here tried to tell you, AYER'S SARSAPARILLA. Glover, Vt., Oct. 21, 1882. Yours truly, W. M. PHILLIPS."

FROM THE FATHER:

"It is both a pleasure and a duty for me to state to you the benefit I have derived from the use of

Ayer's Sarsaparilla.

Six months ago I was completely covered with a terrible humor and scrofulous spots. The humor caused an incessant and intolerable itching, and the skin cracked so as to cause the blood to flow in many places whenever I moved. My sufferings were great, and my life a burden. I commenced the use of the SARSAPARILLA in April last, and have used it regularly since that time. My condition began to improve at once. The sores have all healed, and I feel perfectly well in every respect—being now able to do a good day's work, although 73 years of age. Many inquire what has wrought such a cure in my case, and I tell them, as I have here tried to tell you, AYER'S SARSAPARILLA. Glover, Vt., Oct. 21, 1882. Yours gratefully, HERMAN PHILLIPS."

Ayer's Sarsaparilla cures Scrofula

and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blisters, Sores, Boils, Tumors, and Eruptions of the Skin. It cleans the blood of all impurities, aids digestion, stimulates the action of the bowels, and thus restores vitality and strengthens the whole system.
